

HOMETOWN

AUTO & DETAIL

We Care for What You Care For Most!

Our Services

- \$150-200 on most model vehicles
- Wash and wax
- 200 degree shampoo and steam of entire interior
- Fully cleaned
- Disinfected & treated with professional products
- Full graphene ceramic coatings

DETAIL

- Full wash to perfection
- Micro Polymer Spray
- Clay Bar Treatment
- High Wax Quality
- Full interior shampoo

CERAMIC COATINGS

PROTECT. SHINE. LAST.

Ceramic coatings use a reduced graphene oxide (RGO) matrix grafted onto a silica (SiO_2) ceramic backbone. This advanced nanostructure chemically bonds with the factory paint, creating a durable, hydrophobic layer of protection. The result is unmatched durability, UV resistance, and a deep, long-lasting gloss.

HOW IT WORKS

- 1 RGO-SiO₂ CERAMIC LAYER**
The hydrophobic RGO matrix is grafted onto a SiO₂ ceramic backbone for superior protection and durability.
- 2 BONDING LAYER**
Chemically bonds the ceramic structure to the paint.
- 3 VEHICLE PAINT**
Your factory paint is protected.
- 4 PRIMER (OPTIONAL)**
Enhances bonding and adds an extra layer of protection.

HYDROPHOBIC PROTECTION

Water beads up and rolls off, carrying dirt and grime away.

LONG-LASTING DURABILITY

Provides strong resistance against UV rays, chemicals, and pollutants.

ENHANCED APPEARANCE

Intensifies gloss and depth, keeping your paint looking its best.

EASY MAINTENANCE

Surfaces stay cleaner longer and are easier to wash.

THE BENEFITS

UV PROTECTION

Shields paint from fading and oxidation

BIRD DROP RESISTANCE

Makes acidic droppings easier to remove

CHEMICAL RESISTANCE

Protects against harsh chemicals and road grime

WEATHER PROTECTION

Barrier against rain, snow, and road salt

SWIRL MARK RESISTANCE

Helps prevent minor swirls and scratches
